## 1. Your task is to find total salary Clark has used.

select ename, sum(sal) from emp
where ename='CLARK'
group by ename

ENAME	SUM(SAL)
CLARK	2450

# 2. Find the total number of hours if President works 4 days a weak and 6 hours a day.

select sal ,sal/96 as "one hour sal" from emp

SAL	one hour sal
800	8.3333333333333333333333333333333333333
1600	16.666666666666666666666666666666666666
1250	13.02083333333333333333333333333333333333
2975	30.989583333333333333333333333333333333333
1250	13.02083333333333333333333333333333333333
2850	29.6875
2450	25.5208333333333333333333333333333333333333
3000	31.25
5000	52.08333333333333333333333333333333333333
1500	15.625
1100	11.458333333333333333333333333333333333333
950	9.89583333333333333333333333333333333333
3000	31.25

## 3. Find the sum of salary of employees of Dept no 20.

select deptno,sum(sal) from emp where deptno=20 group by deptno

DEPTNO	SUM(SAL)
20	10875

## 4. Find total employees of dept no. 20.

select count(\*) from emp
where deptno=20

	COUNT(*)
5	

## 5. Get the salary of all clerks.

select job,sum(sal) from emp
where job='CLERK'
group by job

JOB	SUM(SAL)
CLERK	2850

## 6. Show all clerks of deptno. 30.

select ename from emp where deptno=30 and job='CLERK' group by ename

	ENAME
JAMES	

## 7. Get average salary of all departments.

select deptno, avg(sal) from emp group by deptno

DEPTNO	AVG(SAL)
30	1566.6666666666666666666666666666666666
10	3725
20	2175

## 8. Write a query to get the total salaries payable to employees.

select sum(sal) as "total sal of all emp" from emp

	total sal of all emp
27725	

## 9. Get the name and salary of the employee who has been highly paid.

SELECT ename ,sal FROM emp where sal in(select max(sal) from emp)

ENAME	SAL
KING	5000

10. Suppose that dollar rate is 163 rupees. Then find the one day salary in rupees. Like "Akram has One day salary as Rs 639. "

select ename||' has One day salary as Rs ' || (sal\*167)/30 ||'.' as output from emp

#### **OUTPUT**

BLAKE has One day salary as Rs 15865.

SCOTT has One day salary as Rs 16700.

TURNER has One day salary as Rs 8350.

FORD has One day salary as Rs 16700.

11. Suppose the employees get retired after 40 years of service. Then find out that which employees are going to be retired after 2020.

select ename, hiredate, add\_months (hiredate, 40\*12) as output from emp where to\_char(add\_months (hiredate, 40\*12), 'mm/dd/yyyy')>'12/30/2020'

no data found

## 12.Get the highest salary of Dept No. 30.

SELECT max(sal) FROM emp where deptno=30 GROUP BY deptno

#### MAX(SAL)

2850

## 13.Get the no. of employees who have some commission. (Note: '0' will also be calculated )

SELECT count(comm) from emp

#### COUNT(COMM)

4

## 14.Get the average salary of all the Analysts.

SELECT job, avg(sal) FROM emp where job='ANALYST' GROUP BY job

JOB	AVG(SAL)
ANALYST	3000

## 15.Get the average commission of dept no. 20 and 30.

SELECT deptno, avg(comm) FROM emp where deptno in(20,30) GROUP BY deptno

DEPTNO	AVG(COMM)
30	550

## 16. Show the sum of one year salary of all Analysts.

SELECT job, sum(sal)\*12 FROM emp where job='ANALYST' GROUP BY job

JOB	SUM(SAL)*12
ANALYST	72000

# 17.Get the average salary of all departments but you must include salaries greater than 2800.

SELECT deptno, avg(sal) FROM emp where sal>2800 GROUP BY deptno

DEPTNO	AVG(SAL)
30	2850
10	5000
20	2991.66666666666666666666666666666666666

## 18. Show total no. of jobs in each department.

SELECT deptno, count(distinct job) FROM emp GROUP BY deptno

DEPTNO	COUNT(DISTINCTJOB)	
30	3	
10	2	
20	3	

19.Increase the salaries using CASE Expression of Clerks like dept no. 10 clerks will incread 15% and depnt no. 20 will increase 18% and dept no. 30 will have increase of 20%. And then find the one year salary.

#### Sol:

SELECT ename, sal, deptno,
case deptno when 10 then sal+ (sal\*15)/100
when 20 then sal+ (sal\*18)/100
when 30 then sal+ (sal\*20)/100
else sal end "revised salary"

from emp where job='CLERK'

ENAME	SAL	DEPTNO	revised salary
SMITH	800	20	944
ADAMS	1100	20	1298
JAMES	950	30	1140

## 20.Get the average salary of Analysts like 9999\$

SELECT job, concat(TO\_CHAR (avg(sal), '99999'),'\$') as output FROM emp where job='ANALYST'

GROUP BY job

JOB	ОИТРИТ
-----	--------

ANALYST 3000\$
